# Index to Volume 2 January-December 1982

## Subject Index

### A

#### Acyl-CoA cholesterol acyl transferase

Low density lipoprotein metabolism in cultured fibroblasts from a new group of patients presenting clinically with homozygous familial hypercholesterolemia, 303

#### Aging

Characteristics of the aortic intima in young and old cebus and squirrel monkeys, 252

#### American Heart Association Nutrition Committee

Rationale of the Diet-Heart Statement of the American Heart Association, 177

#### American Society for the Study of Arteriosclerosis

Abstracts submitted to the 36th Annual Meeting, Council on Arteriosclerosis, American Society for the Study of Arteriosclerosis, Dallas, Texas, November, 1982, 403a

#### Androsterone

Abnormal hormone levels in men with coronary artery disease, 58

#### Angioplasty

Acute effects of transluminal angioplasty in three experimental models of atherosclerosis, 125

#### Animal model

Acute effects of transluminal angioplasty in three experimental models of atherosclerosis, 125

Concentration and composition of lipoproteins in blood plasma of the WHHL rabbit, 467

#### Animal studies, cow

Linoleic acid metabolism and prostaglandin production by cultured bovine pulmonary artery endothelial cells, 380

#### Animal studies, dog

Modulating effects of canine high density lipoproteins on cholesteryl ester synthesis induced by 8-very low density lipoproteins in macrophages. Possible in vitro correlates with atherosclerosis, 114

#### Animal studies, monkey

Characteristics of the aortic intima in young and old cebus and squirrel monkeys, 252

Social status, environment, and atherosclerosis in cynomolgus monkeys, 359

Structural and functional changes of rhesus serum low-density lipoproteins during cycles of diet-induced hypercholesterolemia, 475

#### Animal studies, pig

Lipoprotein lipase in cultured pig aortic smooth muscle cells, 390

Proteoglycan distribution in areas of differing permeability to Evans blue dye in the aortas of young pigs. An ultrastructural study, 369

#### Animal studies, rabbit

Acute effects of transluminal angioplasty in three experimental models of atherosclerosis, 125

Atherosclerosis in rabbits fed a low cholesterol diet for five years, 228

Comparison of cholesteryl ester transfer from chylomicrons and other plasma lipoproteins to aortic intima media of cholesterol-fed rabbits, 493

Concentration and composition of lipoproteins in blood plasma of the WHHL rabbit, 467

Platelet survival and thrombosis, 458

Use of <sup>3</sup>H-cholesteryl linoleyl ether for the quantitation of plasma cholesteryl ester influx into the aortic wall in hypercholesterolemic rabbits, 281

#### Animal studies, rat

Platelet survival and thrombosis, 458

#### Animal studies, sheep

Radioimmunoassay of apolipoprotein A-II, 160

#### Anthropometric factors

Biochemical and anthropometric determinants of serum B- and pre-B lipoproteins in children. Bogalusa Heart Study, 325

Clustering of anthropometric parameters, glucose tolerance, and serum lipids in children with high and low 6- and pre-6-lipoproteins. Bogalusa Heart Study, 346

#### Aorta

Aortic endothelial and smooth muscle histamine metabolism in experimental diabetes, 142

Characteristics of the aortic intima in young and old cebus and squirrel monkeys, 252

Inhibition of endothelial cell regrowth. Cessation of aortic endothelial cell replication after balloon catheter denudation, 216

Lipoprotein lipase in cultured pig aortic smooth muscle cells, 390

Microscopic morphometry of abdominal aorta from men in New Orleans and Guatemala, 242

Platelet survival and thrombosis, 458

Proteoglycan distribution in areas of differing permeability to Evans blue dye in the aortas of young pigs. An ultrastructural study, 369

Use of <sup>3</sup>H-cholesteryl linoleyl ether for the quantitation of plasma cholesteryl ester influx into the aortic wall in hypercholesterolemic rabbits, 281

#### Aortic catheters

Platelet survival and thrombosis, 458

#### Aortic denudation

Inhibition of endothelial cell regrowth. Cessation of aortic endothelial cell replication after balloon catheter denudation, 216

#### Aortic intima media

Comparison of cholesteryl ester transfer from chylomicrons and other plasma lipoproteins to aortic intima media of cholesterol-fed rabbits, 493

#### Apolipoprotein A-I

Effect of interferon on plasma lipoproteins and the activity of postheparin plasma lipases, 68

Irvine H. Page Young Investigator Award: Plasma apolipoprotein A-1 absence associated with a marked reduction of high density lipoproteins and premature coronary artery disease, 16

#### Apolipoprotein A-II

Radioimmunoassay of apolipoprotein A-II, 160

**Apolipoprotein B**

Concentration and composition of lipoproteins in blood plasma of the WHHL rabbit, 467

Increased apoprotein B in very low density lipoproteins of patients with peripheral vascular disease, 74

**Apolipoprotein C-II**

Increased apoprotein B in very low density lipoproteins of patients with peripheral vascular disease, 74

**Apolipoprotein E**

Concentration and composition of lipoproteins in blood plasma of the WHHL rabbit, 467

**Arachidonic acid**

Linoleic acid metabolism and prostaglandin production by cultured bovine pulmonary artery endothelial cells, 380

**Arterial compliance**

Systemic arterial compliance in patients with arteriosclerosis obliterans of the lower limbs. Observations on the effect of intravenous propranolol, 266

**Arterial influx**

Comparison of cholesteryl ester transfer from chylomicrons and other plasma lipoproteins to aortic intima media of cholesterol-fed rabbits, 493

**Arterial smooth muscle cells**

Atherosclerosis and oral contraceptive use. Serum from oral contraceptive users stimulates growth of arterial smooth muscle cells, 170

A secretory product of human monocyte-derived macrophages stimulates low density lipoprotein receptor activity in arterial smooth muscle cells and skin fibroblasts, 134

**Arterial wall biology**

Prostacyclin and arterial wall biology, 193

**Arteriographic assessment**

Arteriographic assessment of coronary atherosclerosis. Review of current methods, their limitations, and clinical applications, 2

Factors affecting the extent and severity of coronary artery disease in patients enrolled in the Coronary Artery Surgery Study, 208

**Arteriosclerosis journal**

Arteriosclerosis: the first two years, 457

A note of thanks, 1

**Arteriosclerosis obliterans**

Prevalence of severe arteriosclerosis obliterans in patients with diabetes mellitus. Relation to smoking and form of therapy, 275

Systemic arterial compliance in patients with arteriosclerosis obliterans of the lower limbs. Observations on the effect of intravenous propranolol, 266

**Atherosclerosis**

Aortic endothelial and smooth muscle histamine metabolism in experimental diabetes, 142

Atherosclerosis and the biobehavioral sciences, 357

Atherosclerosis in rabbits fed a low cholesterol diet for five years, 228

Characteristics of the aortic intima in young and old cebus and squirrel monkeys, 252

Genetic susceptibility and resistance to diet-induced atherosclerosis and hyperlipoproteinemia, 312

Polyunsaturated fatty acids, hyperlipidemia, and thrombosis, 87

Prostacyclin and arterial wall biology, 193

Relationships of nutrient intake to lipids and lipoproteins in 1234 white children. The Lipid Research Clinics Prevalence Study, 523

Social status, environment, and atherosclerosis in cynomolgus monkeys, 359

Use of <sup>3</sup>H-cholesteryl linoleyl ether for the quantitation of plasma cholesteryl ester influx into the aortic wall in hypercholesterolemic rabbits, 281

**Atherosclerosis, canine**

Modulating effects of canine high density lipoproteins on cholesteryl ester synthesis induced by  $\beta$ -very low density lipoproteins in macrophages. Possible in vitro correlates with atherosclerosis, 114

**Atherosclerosis, coronary**

Arteriographic assessment of coronary atherosclerosis. Review

of current methods, their limitations, and clinical applications, 2

Lipoproteins and Coronary Atherosclerosis, Lugano, Switzerland, October 1-3, 1981, 81

**Atherosclerosis, pediatric**

Microscopic morphometry of abdominal aorta from men in New Orleans and Guatemala, 242

**Atherosclerosis, progression**

Arteriographic assessment of coronary atherosclerosis. Review of current methods, their limitations, and clinical applications, 2

**Atherosclerosis, regression**

Arteriographic assessment of coronary atherosclerosis. Review of current methods, their limitations, and clinical applications, 2

**Atherosclerotic peripheral vascular disease**

Increased apoprotein B in very low density lipoproteins of patients with peripheral vascular disease, 74

**Autoregulation**

Autoregulation of the modified low density lipoprotein receptor in human monocyte-derived macrophages, 487

**B****Balloon catheter**

Inhibition of endothelial cell regrowth. Cessation of aortic endothelial cell replication after balloon catheter denudation, 216

**Behavior**

Atherosclerosis and the biobehavioral sciences, 357

Correlates of low density lipoprotein cholesterol: associations with physical, chemical, dietary, and behavioral characteristics. The Lipid Research Clinics Prevalence Study, 513

Social status, environment, and atherosclerosis in cynomolgus monkeys, 359

**Bile acids**

Triglyceride and cholesterol metabolism in primary hypertriglyceridemia, 44

**Bivariate analysis**

Dietary lipids, sugar, fiber, and mortality from coronary heart disease. Bivariate analysis of international data, 221

**Bogalusa Heart Study**

Biochemical and anthropometric determinants of serum B- and pre-B lipoproteins in children. Bogalusa Heart Study, 325

Lipid composition and interrelationships of major serum lipoproteins. Observations in children with different lipoprotein profiles. Bogalusa Heart Study, 335

**C****Catabolism, histaminase-mediated**

Aortic endothelial and smooth muscle histamine metabolism in experimental diabetes, 142

**Catabolism, lipoproteins**

Roles of lipoprotein lipase and hepatic triglyceride lipase in the catabolism in vivo of triglyceride-rich lipoproteins, 396

**Cell cholesterol**

Cholesterol homeostasis of skin fibroblasts after incubation with postabsorptive and postprandial lipoproteins. The effect of a fatty meal, 290

**Cell culture**

Endothelial cells from umbilical vein and a hemoangioendothelioma secrete basement membrane largely to the exclusion of interstitial procollagens, 27

Linoleic acid metabolism and prostaglandin production by cultured bovine pulmonary artery endothelial cells, 380

**Cell replication**

Inhibition of endothelial cell regrowth. Cessation of aortic endothelial cell replication after balloon catheter denudation, 216

**Centrifugation, density gradient**

Structural and functional changes of rhesus serum low-density lipoproteins during cycles of diet-induced hypercholesterolemia, 475

**Chemical factors**

Correlates of low density lipoprotein cholesterol: associations with physical, chemical, dietary, and behavioral characteristics. The Lipid Research Clinics Prevalence Study, 513

**Children**

Biochemical and anthropometric determinants of serum B- and pre-B lipoproteins in children. Bogalusa Heart Study, 325

Clustering of anthropometric parameters, glucose tolerance, and serum lipids in children with high and low B- and pre-B lipoproteins. Bogalusa Heart Study, 346

Lipid composition and interrelationships of major serum lipoproteins. Observations in children with different lipoprotein profiles. Bogalusa Heart Study, 335

Relationships of nutrient intake to lipids and lipoproteins in 1234 white children. The Lipid Research Clinics Prevalence Study, 523

**Cholesterol**

Atherosclerosis in rabbits fed a low cholesterol diet for five years, 228

Cholesterol homeostasis of skin fibroblasts after incubation with postabsorptive and postprandial lipoproteins. The effect of a fatty meal, 290

Comparison of cholesteryl ester transfer from chylomicrons and other plasma lipoproteins to aortic intima media of cholesterol-fed rabbits, 493

Concentration and composition of lipoproteins in blood plasma of the WHHL rabbit, 467

Decreased plasma phosphatidylcholine/free cholesterol ratio as an indicator of risk for ischemic vascular disease, 296

Dietary determinants of plasma cholesterol change in the recruitment phase of the Lipid Research Clinics Coronary Primary Prevention Trial, 537

Familial associations of lipids and lipoproteins in families of hypercholesterolemic probands, 151

Genetic susceptibility and resistance to diet-induced atherosclerosis and hyperlipoproteinemia, 312

Lipid composition and interrelationships of major serum lipoproteins. Observations in children with different lipoprotein profiles. Bogalusa Heart Study, 335

Modulating effects of canine high density lipoproteins on cholesteryl ester synthesis induced by B-very low density lipoproteins in macrophages. Possible in vitro correlates with atherosclerosis, 114

Proteoglycan distribution in areas of differing permeability to Evans blue dye in the aortas of young pigs. An ultrastructural study, 369

Relation of diet to LDL cholesterol, VLDL cholesterol and triglycerides in white adults. The Lipid Research Clinics Prevalence Study, 502

Triglyceride and cholesterol metabolism in primary hypertriglyceridemia, 44

**Cholesterol esterification**

Structural and functional changes of rhesus serum low-density lipoproteins during cycles of diet-induced hypercholesterolemia, 475

**Cholesterol, high density lipoprotein**

Increased apoprotein B in very low density lipoproteins of patients with peripheral vascular disease, 74

**Cholesterol, low density lipoprotein**

Correlates of low density lipoprotein cholesterol: associations with physical, chemical, dietary, and behavioral characteristics. The Lipid Research Clinics Prevalence Study, 513

Relation of diet to LDL cholesterol, VLDL cholesterol and triglycerides in white adults. The Lipid Research Clinics Prevalence Study, 502

**Cholesterol, very low density lipoprotein**

Relation of diet to LDL cholesterol, VLDL cholesterol and triglycerides in white adults. The Lipid Research Clinics Prevalence Study, 502

**Cholesteryl esters**

Characteristics of the aortic intima in young and old cebus and squirrel monkeys, 252

Comparison of cholesteryl ester transfer from chylomicrons and other plasma lipoproteins to aortic intima media of cholesterol-fed rabbits, 493

Modulating effects of canine high density lipoproteins on cholesteryl ester synthesis induced by B-very low density lipoproteins in macrophages. Possible in vitro correlates with atherosclerosis, 114

Structural and functional changes of rhesus serum low-density lipoproteins during cycles of diet-induced hypercholesterolemia, 475

Use of <sup>3</sup>H-cholesteryl linoleyl ether for the quantitation of plasma cholesteryl ester influx into the aortic wall in hypercholesterolemic rabbits, 281

**Cholesteryl linoleyl ether**

Use of <sup>3</sup>H-cholesteryl linoleyl ether for the quantitation of plasma cholesteryl ester influx into the aortic wall in hypercholesterolemic rabbits, 281

**Chylomicron**

Comparison of cholesteryl ester transfer from chylomicrons and other plasma lipoproteins to aortic intima media of cholesterol-fed rabbits, 493

Concentration and composition of lipoproteins in blood plasma of the WHHL rabbit, 467

**Cigarette smoking**

Factors affecting the extent and severity of coronary artery disease in patients enrolled in the Coronary Artery Surgery Study, 208

Prevalence of severe arteriosclerosis obliterans in patients with diabetes mellitus. Relation to smoking and form of therapy, 275

**Conditioned medium**

Autoregulation of the modified low density lipoprotein receptor in human monocyte-derived macrophages, 487

A secretory product of human monocyte-derived macrophages stimulates low density lipoprotein receptor activity in arterial smooth muscle cells and skin fibroblasts, 134

**Corneal opacification**

Irvine H. Page Young Investigator Award: Plasma apolipoprotein A-1 absence associated with a marked reduction of high density lipoproteins and premature coronary artery disease, 16

**Coronary arteriography**

Arteriographic assessment of coronary atherosclerosis. Review of current methods, their limitations, and clinical applications, 2

**Coronary artery disease**

Abnormal hormone levels in men with coronary artery disease, 58

Dietary lipids, sugar, fiber, and mortality from coronary heart disease. Bivariate analysis of international data, 221

Factors affecting the extent and severity of coronary artery disease in patients enrolled in the Coronary Artery Surgery Study, 208

Irvine H. Page Young Investigator Award: Plasma apolipoprotein A-1 absence associated with a marked reduction of high density lipoproteins and premature coronary artery disease, 16

**Coronary atherosclerosis, see Atherosclerosis, coronary****Coronary vasomobility**

Arteriographic assessment of coronary atherosclerosis. Review of current methods, their limitations, and clinical applications, 2

**Correlations**

Decreased plasma phosphatidylcholine/free cholesterol ratio as an indicator of risk for ischemic vascular disease, 296

**Council on Arteriosclerosis**

Abstracts submitted to the 36th Annual Meeting, Council on Arteriosclerosis, American Society for the Study of Arteriosclerosis, Dallas, Texas, November, 1982, 403a

**D****Dehydroisoandrosterone**

Abnormal hormone levels in men with coronary artery disease, 58

**Diabetes**

Aortic endothelial and smooth muscle histamine metabolism in experimental diabetes, 142

Prevalence of severe arteriosclerosis obliterans in patients with diabetes mellitus. Relation to smoking and form of therapy, 275

**Diet**

Atherosclerosis in rabbits fed a low cholesterol diet for five years, 228

Cholesterol homeostasis of skin fibroblasts after incubation with postabsorptive and postprandial lipoproteins. The effect of a fatty meal, 290

Correlates of low density lipoprotein cholesterol: associations with physical, chemical, dietary, and behavioral characteristics. The Lipid Research Clinics Prevalence Study, 513

Diet and heart disease. Prudence, probability, and proof, 83

Diet and heart disease. Shaping public perceptions when proof is lacking, 85

Dietary determinants of plasma cholesterol change in the recruitment phase of the Lipid Research Clinics Coronary Primary Prevention Trial, 537

Genetic susceptibility and resistance to diet-induced atherosclerosis and hyperlipoproteinemia, 312

Lipoproteins and Coronary Atherosclerosis, Lugano, Switzerland, October 1-3, 1981, 81

Rationale of the Diet-Heart Statement of the American Heart Association, 177

Structural and functional changes of rhesus serum low-density lipoproteins during cycles of diet-induced hypercholesterolemia, 475

**Diet-lipid relationship**

Correlates of low density lipoprotein cholesterol: associations with physical, chemical, dietary, and behavioral characteristics. The Lipid Research Clinics Prevalence Study, 513

Diet-plasma lipid relationship within a free-living population. The Lipid Research Clinics Studies, 500

Microscopic morphometry of abdominal aorta from men in New Orleans and Guatemala, 242

Relation of diet to LDL cholesterol, VLDL cholesterol and triglycerides in white adults. The Lipid Research Clinics Prevalence Study, 502

Relationships of nutrient intake to lipids and lipoproteins in 1234 white children. The Lipid Research Clinics Prevalence Study, 523

**Dietary cholesterol**

Dietary determinants of plasma cholesterol change in the recruitment phase of the Lipid Research Clinics Coronary Primary Prevention Trial, 537

Modulating effects of canine high density lipoproteins on cholesteryl ester synthesis induced by 6-very low density lipoproteins in macrophages. Possible in vitro correlates with atherosclerosis, 114

**Dietary fats**

Linoleic acid metabolism and prostaglandin production by cultured bovine pulmonary artery endothelial cells, 380

Polyunsaturated fatty acids, hyperlipidemia, and thrombosis, 87

Rationale of the Diet-Heart Statement of the American Heart Association, 177

Relation of diet to LDL cholesterol, VLDL cholesterol and triglycerides in white adults. The Lipid Research Clinics Prevalence Study, 502

Structural and functional changes of rhesus serum low-density lipoproteins during cycles of diet-induced hypercholesterolemia, 475

**Dietary fiber**

Dietary lipids, sugar, fiber, and mortality from coronary heart disease. Bivariate analysis of international data, 221

**Dietary lipids**

Dietary lipids, sugar, fiber, and mortality from coronary heart disease. Bivariate analysis of international data, 221

**Dietary recall**

Dietary determinants of plasma cholesterol change in the recruitment phase of the Lipid Research Clinics Coronary Primary Prevention Trial, 537

**Dietary sugar**

Dietary lipids, sugar, fiber, and mortality from coronary heart disease. Bivariate analysis of international data, 221

**Drug treatment**

Lipoproteins and Coronary Atherosclerosis, Lugano, Switzerland, October 1-3, 1981, 81

Prevalence of severe arteriosclerosis obliterans in patients with diabetes mellitus. Relation to smoking and form of therapy, 275

**E****Editorial**

Arteriosclerosis: the first two years, 457

Diet and heart disease. Prudence, probability, and proof, 83

Diet and heart disease. Shaping public perceptions when proof is lacking, 85

Diet-plasma lipid relationship within a free-living population. The Lipid Research Clinics Studies, 500

**Endothelioma**

Endothelial cells from umbilical vein and a hemoangioendothelioma secrete basement membrane largely to the exclusion of interstitial procollagens, 27

**Endothelium**

Aortic endothelial and smooth muscle histamine metabolism in experimental diabetes, 142

Endothelial cells from umbilical vein and a hemoangioendothelioma secrete basement membrane largely to the exclusion of interstitial procollagens, 27

Inhibition of endothelial cell regrowth. Cessation of aortic endothelial cell replication after balloon catheter denudation, 216

Linoleic acid metabolism and prostaglandin production by cultured bovine pulmonary artery endothelial cells, 380

**Environment**

Familial associations of lipids and lipoproteins in families of hypercholesterolemic probands, 151

Social status, environment, and atherosclerosis in cynomolgus monkeys, 359

**Epidemiology**

Atherosclerosis and the biobehavioral sciences, 357

Correlates of low density lipoprotein cholesterol: associations with physical, chemical, dietary, and behavioral characteristics. The Lipid Research Clinics Prevalence Study, 513

Factors affecting the extent and severity of coronary artery disease in patients enrolled in the Coronary Artery Surgery Study, 208

Familial associations of lipids and lipoproteins in families of hypercholesterolemic probands, 151

Lipoproteins and Coronary Atherosclerosis, Lugano, Switzerland, October 1-3, 1981, 81

Relation of diet to LDL cholesterol, VLDL cholesterol and triglycerides in white adults. The Lipid Research Clinics Prevalence Study, 502

Relationships of nutrient intake to lipids and lipoproteins in 1234 white children. The Lipid Research Clinics Prevalence Study, 523

### Estrogens

Abnormal hormone levels in men with coronary artery disease, 58

Atherosclerosis and oral contraceptive use. Serum from oral contraceptive users stimulates growth of arterial smooth muscle cells, 170

### Estrone

Abnormal hormone levels in men with coronary artery disease, 58

### Extracellular matrix

Endothelial cells from umbilical vein and a hemoangioendothelioma secrete basement membrane largely to the exclusion of interstitial procollagens, 27

## F

### Familial combined hyperlipidemia

Triglyceride and cholesterol metabolism in primary hypertriglyceridemia, 44

### Familial hypercholesterolemia

Concentration and composition of lipoproteins in blood plasma of the WHHL rabbit, 467

Familial associations of lipids and lipoproteins in families of hypercholesterolemic probands, 151

Low density lipoprotein metabolism in cultured fibroblasts from a new group of patients presenting clinically with homozygous familial hypercholesterolemia, 303

### Fatty acids

Linoleic acid metabolism and prostaglandin production by cultured bovine pulmonary artery endothelial cells, 380

Polyunsaturated fatty acids, hyperlipidemia, and thrombosis, 87

Rationale of the Diet-Heart Statement of the American Heart Association, 177

Relation of diet to LDL cholesterol, VLDL cholesterol and triglycerides in white adults. The Lipid Research Clinics Prevalence Study, 502

Structural and functional changes of rhesus serum low-density lipoproteins during cycles of diet-induced hypercholesterolemia, 475

### Fiber

Dietary lipids, sugar, fiber, and mortality from coronary heart disease. Bivariate analysis of international data, 221

### Fibroblasts

Cholesterol homeostasis of skin fibroblasts after incubation with postabsorptive and postprandial lipoproteins. The effect of a fatty meal, 290

Low density lipoprotein metabolism in cultured fibroblasts from a new group of patients presenting clinically with homozygous familial hypercholesterolemia, 303

A secretory product of human monocyte-derived macrophages stimulates low density lipoprotein receptor activity in arterial smooth muscle cells and skin fibroblasts, 134

### Fish liver oil

Polyunsaturated fatty acids, hyperlipidemia, and thrombosis, 87

## G

### Genetics

Familial associations of lipids and lipoproteins in families of hypercholesterolemic probands, 151

Genetic susceptibility and resistance to diet-induced atherosclerosis and hyperlipoproteinemia, 312

Low density lipoprotein metabolism in cultured fibroblasts from a new group of patients presenting clinically with homozygous familial hypercholesterolemia, 303

Triglyceride and cholesterol metabolism in primary hypertriglyceridemia, 44

### Glucose tolerance

Clustering of anthropometric parameters, glucose tolerance, and serum lipids in children with high and low 6- and pre-6-lipoproteins. Bogalusa Heart Study, 346

### Guatemala study

Microscopic morphometry of abdominal aorta from men in New Orleans and Guatemala, 242

## H

### Heart disease

Diet and heart disease. Prudence, probability, and proof, 83

Diet and heart disease. Shaping public perceptions when proof is lacking, 85

Dietary lipids, sugar, fiber, and mortality from coronary heart disease. Bivariate analysis of international data, 221

Rationale of the Diet-Heart Statement of the American Heart Association, 177

### Hemangioendothelioma

Endothelial cells from umbilical vein and a hemoangioendothelioma secrete basement membrane largely to the exclusion of interstitial procollagens, 27

### Hemostasis

Prostacyclin and arterial wall biology, 193

### Hepatic disease, see Lipase, hepatic

### Histamine metabolism

Aortic endothelial and smooth muscle histamine metabolism in experimental diabetes, 142

### Hormones

Abnormal hormone levels in men with coronary artery disease, 58

### Hypercholesterolemia

Concentration and composition of lipoproteins in blood plasma of the WHHL rabbit, 467

Dietary determinants of plasma cholesterol change in the recruitment phase of the Lipid Research Clinics Coronary Primary Prevention Trial, 537

Familial associations of lipids and lipoproteins in families of hypercholesterolemic probands, 151

Low density lipoprotein metabolism in cultured fibroblasts from a new group of patients presenting clinically with homozygous familial hypercholesterolemia, 303

Structural and functional changes of rhesus serum low-density lipoproteins during cycles of diet-induced hypercholesterolemia, 475

Use of <sup>3</sup>H-cholesteryl linoleyl ether for the quantitation of plasma cholesteryl ester influx into the aortic wall in hypercholesterolemic rabbits, 281

### Hyperlipidemia

Polyunsaturated fatty acids, hyperlipidemia, and thrombosis, 87

### Hyperlipoproteinemia

Genetic susceptibility and resistance to diet-induced atherosclerosis and hyperlipoproteinemia, 312

Increased apolipoprotein B in very low density lipoproteins of patients with peripheral vascular disease, 74

Modulating effects of canine high density lipoproteins on cholesteryl ester synthesis induced by 6-very low density lipoproteins in macrophages. Possible in vitro correlates with atherosclerosis, 114

### Hypertriglyceridemia

Triglyceride and cholesterol metabolism in primary hypertriglyceridemia, 44

## I

**Insulin**

- Aortic endothelial and smooth muscle histamine metabolism in experimental diabetes, 142
- Clustering of anthropometric parameters, glucose tolerance, and serum lipids in children with high and low 6- and pre-6-lipoproteins. Bogalusa Heart Study, 346
- Prevalence of severe arteriosclerosis obliterans in patients with diabetes mellitus. Relation to smoking and form of therapy, 275

**Interferon**

- Effect of interferon on plasma lipoproteins and the activity of postheparin plasma lipases, 68

**Ischemic vascular disease**

- Decreased plasma phosphatidylcholine/free cholesterol ratio as an indicator of risk for ischemic vascular disease, 296

## L

**Linoleic acid**

- Linoleic acid metabolism and prostaglandin production by cultured bovine pulmonary artery endothelial cells, 380

**Lipase, hepatic**

- Effect of interferon on plasma lipoproteins and the activity of postheparin plasma lipases, 68
- Roles of lipoprotein lipase and hepatic triglyceride lipase in the catabolism in vivo of triglyceride-rich lipoproteins, 396

**Lipase, lipoprotein**

- Effect of interferon on plasma lipoproteins and the activity of postheparin plasma lipases, 68
- Lipoprotein lipase in cultured pig aortic smooth muscle cells, 390
- Roles of lipoprotein lipase and hepatic triglyceride lipase in the catabolism in vivo of triglyceride-rich lipoproteins, 396

**Lipid composition**

- Clustering of anthropometric parameters, glucose tolerance, and serum lipids in children with high and low 6- and pre-6-lipoproteins. Bogalusa Heart Study, 346
- Lipid composition and interrelationships of major serum lipoproteins. Observations in children with different lipoprotein profiles. Bogalusa Heart Study, 335
- Structural and functional changes of rhesus serum low-density lipoproteins during cycles of diet-induced hypercholesterolemia, 475

**Lipid Research Clinics Studies**

- Correlates of low density lipoprotein cholesterol: associations with physical, chemical, dietary, and behavioral characteristics. The Lipid Research Clinics Prevalence Study, 513
- Diet-plasma lipid relationship within a free-living population. The Lipid Research Clinics Studies, 500
- Dietary determinants of plasma cholesterol change in the recruitment phase of the Lipid Research Clinics Coronary Primary Prevention Trial, 537
- Relation of diet to LDL cholesterol, VLDL cholesterol and triglycerides in white adults. The Lipid Research Clinics Prevalence Study, 502
- Relationships of nutrient intake to lipids and lipoproteins in 1234 white children. The Lipid Research Clinics Prevalence Study, 523

**Lipid score**

- Dietary lipids, sugar, fiber, and mortality from coronary heart disease. Bivariate analysis of international data, 221

**Lipids total profile**

- Decreased plasma phosphatidylcholine/free cholesterol ratio as an indicator of risk for ischemic vascular disease, 296

**Lipoprotein lipase, see Lipase, lipoprotein****Lipoprotein sizing**

- Neonatal umbilical cord blood lipoproteins. Isolation and characterization of intermediate density and low density lipoproteins, 37

**Lipoproteins**

- Cholesterol homeostasis of skin fibroblasts after incubation with postabsorptive and postprandial lipoproteins. The effect of a fatty meal, 290
- Genetic susceptibility and resistance to diet-induced atherosclerosis and hyperlipoproteinemia, 312
- Lipoproteins and Coronary Atherosclerosis, Lugano, Switzerland, October 1-3, 1981, 81

**Lipoproteins, beta**

- Biochemical and anthropometric determinants of serum B- and pre-B lipoproteins in children. Bogalusa Heart Study, 325
- Clustering of anthropometric parameters, glucose tolerance, and serum lipids in children with high and low 6- and pre-6-lipoproteins. Bogalusa Heart Study, 346

**Lipoproteins, high density (HDL)**

- Effect of interferon on plasma lipoproteins and the activity of postheparin plasma lipases, 68
- Irvine H. Page Young Investigator Award: Plasma apolipoprotein A-1 absence associated with a marked reduction of high density lipoproteins and premature coronary artery disease, 16
- Lipid composition and interrelationships of major serum lipoproteins. Observations in children with different lipoprotein profiles. Bogalusa Heart Study, 335
- Modulating effects of canine high density lipoproteins on cholesteryl ester synthesis induced by 6-very low density lipoproteins in macrophages. Possible in vitro correlates with atherosclerosis, 114

**Lipoproteins, intermediate density (IDL)**

- Comparison of cholesteryl ester transfer from chylomicrons and other plasma lipoproteins to aortic intima media of cholesterol-fed rabbits, 493
- Concentration and composition of lipoproteins in blood plasma of the WHHL rabbit, 467
- Neonatal umbilical cord blood lipoproteins. Isolation and characterization of intermediate density and low density lipoproteins, 37
- Roles of lipoprotein lipase and hepatic triglyceride lipase in the catabolism in vivo of triglyceride-rich lipoproteins, 396

**Lipoproteins, low density (LDL)**

- Autoregulation of the modified low density lipoprotein receptor in human monocyte-derived macrophages, 487
- Concentration and composition of lipoproteins in blood plasma of the WHHL rabbit, 467
- Correlates of low density lipoprotein cholesterol: associations with physical, chemical, dietary, and behavioral characteristics. The Lipid Research Clinics Prevalence Study, 513
- Effect of interferon on plasma lipoproteins and the activity of postheparin plasma lipases, 68
- Lipid composition and interrelationships of major serum lipoproteins. Observations in children with different lipoprotein profiles. Bogalusa Heart Study, 335
- Low density lipoprotein metabolism in cultured fibroblasts from a new group of patients presenting clinically with homozygous familial hypercholesterolemia, 303
- Neonatal umbilical cord blood lipoproteins. Isolation and characterization of intermediate density and low density lipoproteins, 37
- Relation of diet to LDL cholesterol, VLDL cholesterol and triglycerides in white adults. The Lipid Research Clinics Prevalence Study, 502
- A secretory product of human monocyte-derived macrophages stimulates low density lipoprotein receptor activity in arterial smooth muscle cells and skin fibroblasts, 134
- Structural and functional changes of rhesus serum low-density lipoproteins during cycles of diet-induced hypercholesterolemia, 475

**Lipoproteins, Lp(a)**

- Structural and functional changes of rhesus serum low-density lipoproteins during cycles of diet-induced hypercholesterolemia, 475

**Lipoproteins, prebeta**

Biochemical and anthropometric determinants of serum B- and pre-B lipoproteins in children. Bogalusa Heart Study, 325  
Clustering of anthropometric parameters, glucose tolerance, and serum lipids in children with high and low  $\beta$ - and pre- $\beta$ -lipoproteins. Bogalusa Heart Study, 346

**Lipoproteins, serum**

Biochemical and anthropometric determinants of serum B- and pre-B lipoproteins in children. Bogalusa Heart Study, 325  
Clustering of anthropometric parameters, glucose tolerance, and serum lipids in children with high and low  $\beta$ - and pre- $\beta$ -lipoproteins. Bogalusa Heart Study, 346  
Lipid composition and interrelationships of major serum lipoproteins. Observations in children with different lipoprotein profiles. Bogalusa Heart Study, 335

**Lipoproteins, very low density beta ( $\beta$ -VLDL)**

Modulating effects of canine high density lipoproteins on cholesteryl ester synthesis induced by  $\beta$ -very low density lipoproteins in macrophages. Possible in vitro correlates with atherosclerosis, 114

**Lipoproteins, very low density (VLDL)**

Comparison of cholesteryl ester transfer from chylomicrons and other plasma lipoproteins to aortic intima media of cholesterol-fed rabbits, 493  
Concentration and composition of lipoproteins in blood plasma of the WHHL rabbit, 467  
Effect of interferon on plasma lipoproteins and the activity of postheparin plasma lipases, 68  
Increased apoprotein B in very low density lipoproteins of patients with peripheral vascular disease, 74  
Lipid composition and interrelationships of major serum lipoproteins. Observations in children with different lipoprotein profiles. Bogalusa Heart Study, 335  
Relation of diet to LDL cholesterol, VLDL cholesterol and triglycerides in white adults. The Lipid Research Clinics Prevalence Study, 502  
Roles of lipoprotein lipase and hepatic triglyceride lipase in the catabolism in vivo of triglyceride-rich lipoproteins, 396  
Triglyceride and cholesterol metabolism in primary hypertriglyceridemia, 44

**Liver**

Use of  $^3\text{H}$ -cholesteryl linoleyl ether for the quantitation of plasma cholesteryl ester influx into the aortic wall in hypercholesterolemic rabbits, 281

**Lower limbs**

Systemic arterial compliance in patients with arteriosclerosis obliterans of the lower limbs. Observations on the effect of intravenous propranolol, 266

**M****Macrophages**

Autoregulation of the modified low density lipoprotein receptor in human monocyte-derived macrophages, 487  
Modulating effects of canine high density lipoproteins on cholesteryl ester synthesis induced by  $\beta$ -very low density lipoproteins in macrophages. Possible in vitro correlates with atherosclerosis, 114  
A secretory product of human monocyte-derived macrophages stimulates low density lipoprotein receptor activity in arterial smooth muscle cells and skin fibroblasts, 134

**Meeting summary**

Fifth National Conference on Thrombosis, Dallas, Texas, November 15-18, 1982, 272  
Lipoproteins and Coronary Atherosclerosis, Lugano, Switzerland, October 1-3, 1981, 81

**Mestranol**

Atherosclerosis and oral contraceptive use. Serum from oral contraceptive users stimulates growth of arterial smooth muscle cells, 170

**Mitogenic serum**

Structural and functional changes of rhesus serum low-density lipoproteins during cycles of diet-induced hypercholesterolemia, 475

**Monocytes**

Autoregulation of the modified low density lipoprotein receptor in human monocyte-derived macrophages, 487  
A secretory product of human monocyte-derived macrophages stimulates low density lipoprotein receptor activity in arterial smooth muscle cells and skin fibroblasts, 134

**Morphometry**

Microscopic morphometry of abdominal aorta from men in New Orleans and Guatemala, 242

**Myocardial infarction**

Abnormal hormone levels in men with coronary artery disease, 58

**N****National Heart, Lung, and Blood Institute**

Atherosclerosis and the biobehavioral sciences, 357

**Neonatal lipoproteins**

Neonatal umbilical cord blood lipoproteins. Isolation and characterization of intermediate density and low density lipoproteins, 37

**New Orleans study**

Microscopic morphometry of abdominal aorta from men in New Orleans and Guatemala, 242

**Nutrient intake**

Relationships of nutrient intake to lipids and lipoproteins in 1234 white children. The Lipid Research Clinics Prevalence Study, 523

**O****Obesity**

Biochemical and anthropometric determinants of serum B- and pre-B lipoproteins in children. Bogalusa Heart Study, 325  
Clustering of anthropometric parameters, glucose tolerance, and serum lipids in children with high and low  $\beta$ - and pre- $\beta$ -lipoproteins. Bogalusa Heart Study, 346

**Oral contraceptives**

Atherosclerosis and oral contraceptive use. Serum from oral contraceptive users stimulates growth of arterial smooth muscle cells, 170

**P****Page, Irvine H., Young Investigator Award**

Irvine H. Page Young Investigator Award: Plasma apolipoprotein A-1 absence associated with a marked reduction of high density lipoproteins and premature coronary artery disease, 16

**Permeability**

Proteoglycan distribution in areas of differing permeability to Evans blue dye in the aortas of young pigs. An ultrastructural study, 369

**Phosphatidylcholine/free cholesterol ratio**

Decreased plasma phosphatidylcholine/free cholesterol ratio as an indicator of risk for ischemic vascular disease, 296

**Physical factors**

Correlates of low density lipoprotein cholesterol: associations with physical, chemical, dietary, and behavioral characteristics. The Lipid Research Clinics Prevalence Study, 513

**Plasma free cholesterol**

Decreased plasma phosphatidylcholine/free cholesterol ratio as an indicator of risk for ischemic vascular disease, 296

**Platelets**

Platelet survival and thrombosis, 458  
Polyunsaturated fatty acids, hyperlipidemia, and thrombosis, 87  
Prostacyclin and arterial wall biology, 193

**Plethysmography**

Increased apoprotein B in very low density lipoproteins of patients with peripheral vascular disease, 74

**Postprandial lipoproteins**

Cholesterol homeostasis of skin fibroblasts after incubation with postabsorptive and postprandial lipoproteins. The effect of a fatty meal, 290

**Princeton School Family Study**

Familial associations of lipids and lipoproteins in families of hypercholesterolemic probands, 151

**Procollagen synthesis**

Endothelial cells from umbilical vein and a hemoangioendothelioma secrete basement membrane largely to the exclusion of interstitial procollagens, 27

**Propranolol**

Systemic arterial compliance in patients with arteriosclerosis obliterans of the lower limbs. Observations on the effect of intravenous propranolol, 266

**Prostacyclin**

Linoleic acid metabolism and prostaglandin production by cultured bovine pulmonary artery endothelial cells, 380  
Polyunsaturated fatty acids, hyperlipidemia, and thrombosis, 87  
Prostacyclin and arterial wall biology, 193

**Prostaglandins**

Linoleic acid metabolism and prostaglandin production by cultured bovine pulmonary artery endothelial cells, 380  
Polyunsaturated fatty acids, hyperlipidemia, and thrombosis, 87

**Proteoglycan**

Proteoglycan distribution in areas of differing permeability to Evans blue dye in the aortas of young pigs. An ultrastructural study, 369

**Pulmonary artery**

Linoleic acid metabolism and prostaglandin production by cultured bovine pulmonary artery endothelial cells, 380

**Q****Quantitative arteriography**

Arteriographic assessment of coronary atherosclerosis. Review of current methods, their limitations, and clinical applications, 2

**R****Radioimmunoassay**

Radioimmunoassay of apolipoprotein A-II, 160

**Receptors**

Autoregulation of the modified low density lipoprotein receptor in human monocyte-derived macrophages, 487

**Reductase, HMG-CoA**

Cholesterol homeostasis of skin fibroblasts after incubation with postabsorptive and postprandial lipoproteins. The effect of a fatty meal, 290

**Regression**

Atherosclerosis in rabbits fed a low cholesterol diet for five years, 228

**Risk factors**

Biochemical and anthropometric determinants of serum B- and pre-B lipoproteins in children. Bogalusa Heart Study, 325  
Clustering of anthropometric parameters, glucose tolerance, and serum lipids in children with high and low 6- and pre-6-lipoproteins. Bogalusa Heart Study, 346  
Decreased plasma phosphatidylcholine/free cholesterol ratio as an indicator of risk for ischemic vascular disease, 296

Factors affecting the extent and severity of coronary artery disease in patients enrolled in the Coronary Artery Surgery Study, 208

Lipid composition and interrelationships of major serum lipoproteins. Observations in children with different lipoprotein profiles. Bogalusa Heart Study, 335

**S****Skin fibroblasts**

Cholesterol homeostasis of skin fibroblasts after incubation with postabsorptive and postprandial lipoproteins. The effect of a fatty meal, 290

A secretory product of human monocyte-derived macrophages stimulates low density lipoprotein receptor activity in arterial smooth muscle cells and skin fibroblasts, 134

**Smooth muscle**

Aortic endothelial and smooth muscle histamine metabolism in experimental diabetes, 142

Atherosclerosis and oral contraceptive use. Serum from oral contraceptive users stimulates growth of arterial smooth muscle cells, 170

Lipoprotein lipase in cultured pig aortic smooth muscle cells, 390

A secretory product of human monocyte-derived macrophages stimulates low density lipoprotein receptor activity in arterial smooth muscle cells and skin fibroblasts, 134

Structural and functional changes of rhesus serum low-density lipoproteins during cycles of diet-induced hypercholesterolemia, 475

**Social status**

Social status, environment, and atherosclerosis in cynomolgus monkeys, 359

**Stress**

Social status, environment, and atherosclerosis in cynomolgus monkeys, 359

**Sugar**

Dietary lipids, sugar, fiber, and mortality from coronary heart disease. Bivariate analysis of international data, 221

**Sulfonylurea**

Prevalence of severe arteriosclerosis obliterans in patients with diabetes mellitus. Relation to smoking and form of therapy, 275

**T****Thrombosis**

Fifth Annual Conference on Thrombosis, Dallas, Texas, November 15-18, 1982, 272

Platelet survival and thrombosis, 458

Polyunsaturated fatty acids, hyperlipidemia, and thrombosis, 87

**Thromboxane**

Polyunsaturated fatty acids, hyperlipidemia, and thrombosis, 87

**Thromboxane A<sub>2</sub>**

Prostacyclin and arterial wall biology, 193

**Tryglycerides**

Concentration and composition of lipoproteins in blood plasma of the WHHL rabbit, 467

Genetic susceptibility and resistance to diet-induced atherosclerosis and hyperlipoproteinemia, 312

Lipid composition and interrelationships of major serum lipoproteins. Observations in children with different lipoprotein profiles. Bogalusa Heart Study, 335

Relation of diet to LDL cholesterol, VLDL cholesterol and triglycerides in white adults. The Lipid Research Clinics Prevalence Study, 502

Roles of lipoprotein lipase and hepatic triglyceride lipase in the catabolism in vivo of triglyceride-rich lipoproteins, 396

Triglyceride and cholesterol metabolism in primary hypertriglyceridemia, 44

**U**

**Ultrastructure**

Proteoglycan distribution in areas of differing permeability to Evans blue dye in the aortas of young pigs. An ultrastructural study, 369

**Umbilical cord**

Endothelial cells from umbilical vein and a hemoangioendothelioma secrete basement membrane largely to the exclusion of interstitial procollagens, 27

Neonatal umbilical cord blood lipoproteins. Isolation and characterization of intermediate density and low density lipoproteins, 37

**Urinary hormone excretion**

Abnormal hormone levels in men with coronary artery disease, 58

**V**

**Vascular disease, peripheral**

Increased apoprotein B in very low density lipoproteins of patients with peripheral vascular disease, 74

**Vessel injury**

Platelet survival and thrombosis, 458

**W**

**Waternabe-heritable hyperlipidemic rabbits**

Concentration and composition of lipoproteins in blood plasma of the WHHL rabbit, 467
